

Qwest AdaptiveBuild

Qwest® AdaptiveBuild® means purpose-built optical networks

Qwest is unique—just like your company. Its innovative, customer-centric approach to providing reliable optical networks is reflected in its proprietary process known as AdaptiveBuild.

AdaptiveBuild, an award-winning process, delivers fully managed, end-to-end optical networks designed for the specific needs of enterprises and service providers.

Description

Leveraging its expertise in metropolitan network design, construction and operation, Qwest begins the AdaptiveBuild process by identifying specific customer needs and requirements for key IT initiatives and applications such as business continuity, storage, network convergence and Internet infrastructure. Based on those needs, Qwest then designs complex, one-of-a-kind networks that serve as the underlying infrastructure. Through extensive knowledge of the local fiber landscape, Qwest can use its existing metropolitan networks and additional available resources to build, integrate and turn up your network very quickly.

Features of an AdaptiveBuild network

- Project-managed implementation
- Highly secure
- Superior performance
- Proactive support
- End-to-end service level agreement (SLA)
- Solutions created to exact customer requirements

Benefits

- Tailored solutions to fit your business' specific requirements
- Assured full diversity where specified
- Sourced with the best assets available
- Delivered to you on time, on your terms
- Expertise – Qwest has years of experience in designing and delivering custom solutions to meet your business needs.

Why buy from Qwest?

- Qwest is a Fortune 500 company with a track record of reliability and quality service as well as an extensive suite of products and support services.
- Qwest has a vast multi-application, nationwide footprint that provides a variety of services.
- Single-service provider – Qwest Metro Optical Ethernet (QMOE) is one of a suite of solutions offered by Qwest.

Other products available from Qwest

In addition to AdaptiveBuild, Qwest has an array of products to meet your metro needs, including:

- Qwest Metro Private Line
- Qwest Metro Optical Ethernet
- QWave®
